

TILES ON PAPER

Spring 2020

L'ambiente bagno rappresenta da sempre il luogo più intimo della propria casa, assumendo il ruolo di rifugio nel rifugio: uno spazio dove recuperare energia e ritemparsi.

Il concetto di stanza da bagno è al centro del nuovo numero di Tiles on Paper, magazine digitale di Ceramica Vogue per la ricerca e la proposta di possibili abbinamenti non solo tra le numerose soluzioni ceramiche dell'azienda, ma in generale con tutti gli elementi che caratterizzano l'ambiente bagno con cui devono trovare un dialogo architettonico equilibrato.

Le proposte - realizzate con la nuova collezione System, aggiornata nei colori e nei formati per rispondere alle nuove tendenze e ai nuovi usi per l'arredo di spazi interni - puntano a suggerire ambienti bagno dove la ceramica, utilizzata secondo schemi di posa sempre diversi, diventa l'assoluta protagonista.

La stanza da bagno diventa quindi il luogo più intimo e prezioso della casa, dove il gusto italiano, la funzionalità e coerenza progettuale si mettono a servizio del benessere individuale.

The bathroom has always been the most intimate domestic space in everyone's life, assuming the role of deep own refuge: a space allowing people to quietly recover themselves physically and mentally.

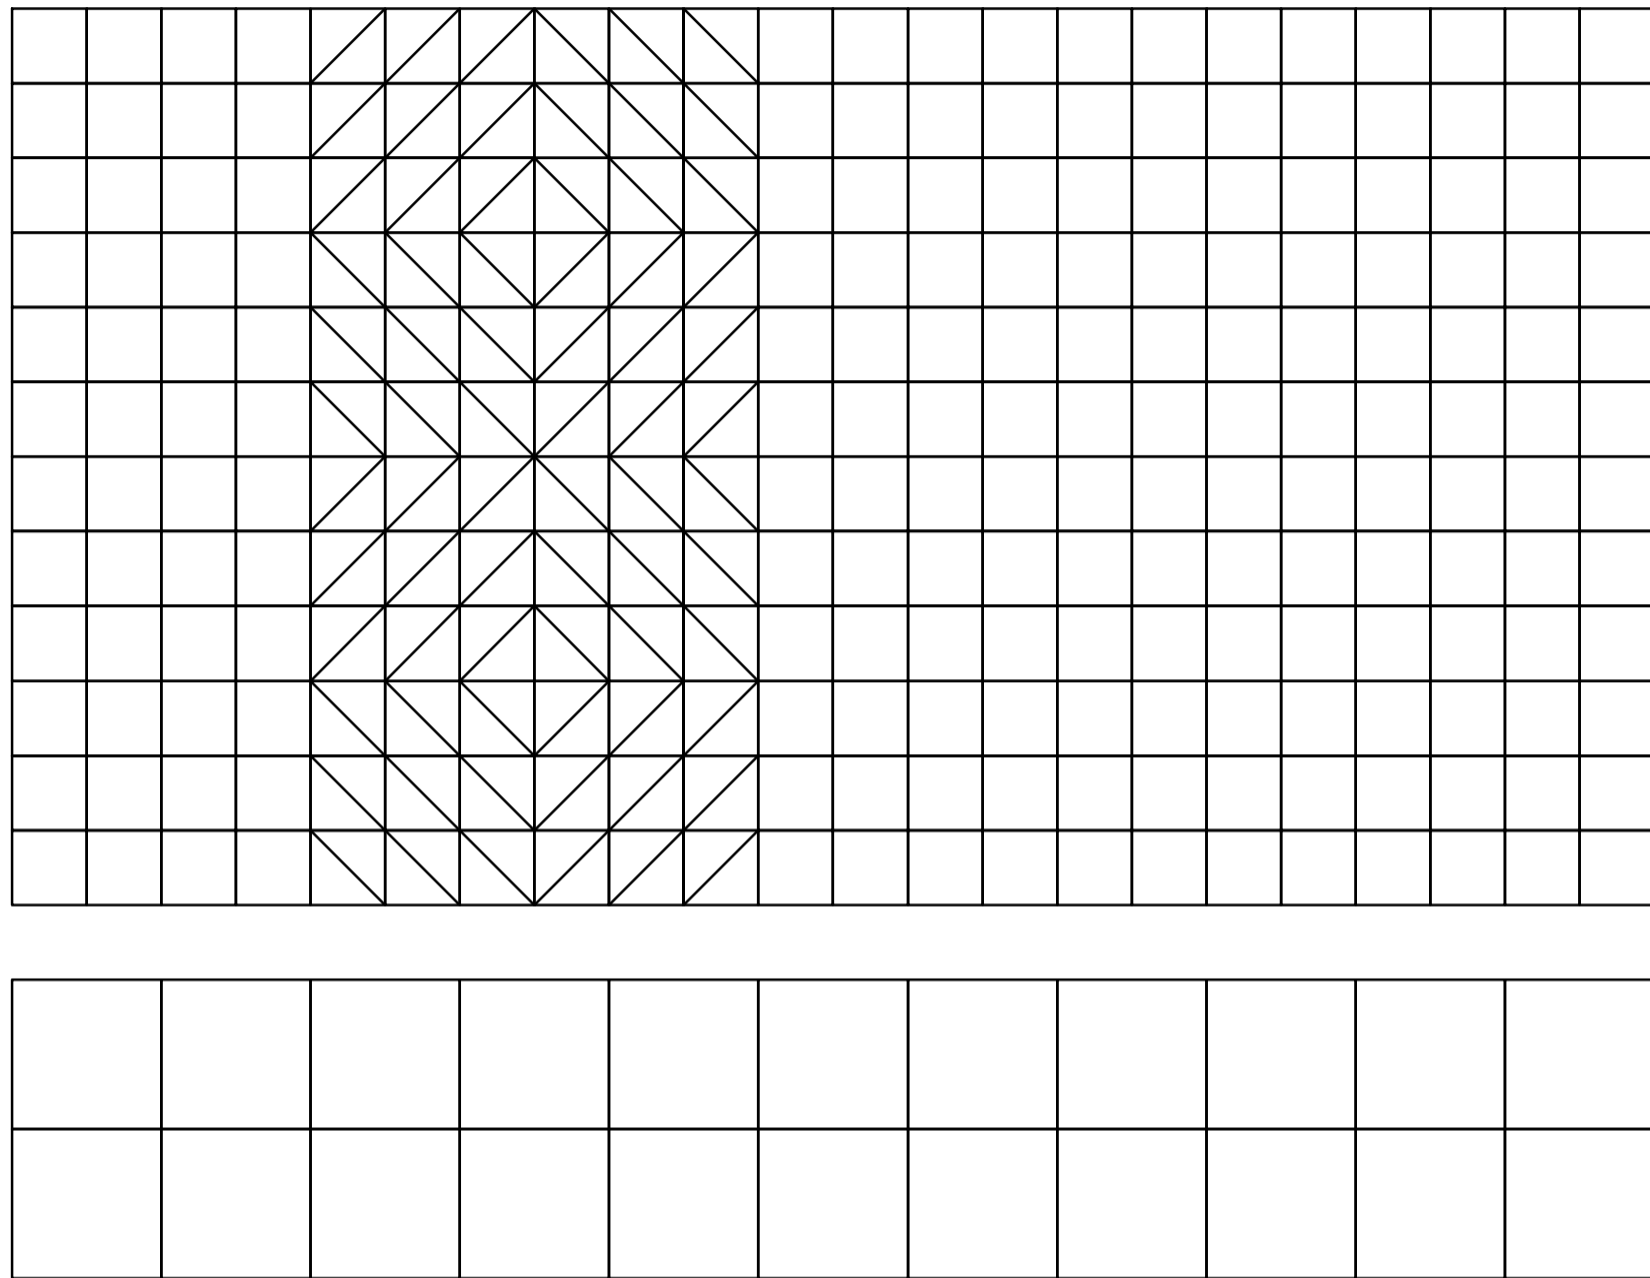

The concept of bathroom is the topic on which the new edition of Tiles on Paper, the digital magazine by Ceramica Vogue, focuses, suggesting possible matches not only among the several ceramic solutions offered by the firm but also comprehending all those accessories typically featuring a bathroom, searching to establish an harmonious architectural and well-balanced dialogue together.

These proposals, realized with the new System collection recently updated with new colours and formats meeting thus the new interior design tendencies and product applications, aim to suggest bathroom interior concepts where ceramics, laid in different ways, becomes the main character.

The bathroom represents the most intimate and precious home's space, where Italian taste, functionality and projectual coherence are of service to the individual well-being.
